

# Naviance "Scattergrams" and Statistics

Naviance can produce graphs called Scattergrams that shows the acceptance history of a college using Grade Point Average and test scores. A Scattergram shows acceptances, denied and wait-listed by symbols found in the legend.

The information on a Scattergram is unique to PVHS and is based on information reported by seniors before they graduate.

- Students must enter their test scores on Naviance in order to see themselves on the Scattergram graph.
- Grade Point Averages are unique to PVHS students. The comparison is with other PVHS students. All GPAs are entered by PVPUSD.
- Tests can be changed to compare SAT or ACT scores.

The purpose of Scattergram is to show how a student compares with the application history of a particular college as it pertains to PVHS, only.
